

SharpShooter®

WITH RATE SYNC®

Every Leaf Perfectly Treated

SharpShooter® is not the same old sprayer technology. It delivers your chemicals with an accuracy conventional spraying is less likely to achieve.

Remove the worries and consequences of maintaining pressure, changing nozzles, excessive wind, and all the other hassles that come with standard sprayers.

Flip this sheet over to see how the SharpShooter® technology is able to accomplish the seemingly impossible.

ALWAYS THE RIGHT DROPLET SIZE - EVERY TIME

Spraying without droplet size is just wasting time.

The right droplet size is critical to getting the best performance from your chemicals.

No misapplication - just the application you want.
